DIRECTOR OF FEDERAL FUR
ANIMAL STATION RESIGNS

Dr. Karl B. Hanson, for 17 years director of the U. S. Fur Animal Experiment Station maintained at Saratoga Springs, N. Y., by the Bureau of Biological Survey, has resigned to become ranch veterinarian for a commercial fox-farming company at Thiensville, Wis., the Bureau announces.

Recognized as one of the outstanding veterinarians connected with the fur-farming industry, Dr. Hanson, says the Bureau, has directed research on foxes, martens, minks, and other fur bearers with results of great value to the industry. It is understood that as ranch veterinarian he will continue his research on fox diseases, centering his attention immediately on fox distemper and encephalitis.
